Dear TechVerdi Team,

My name is Mig, a large-scale educational & entertainment platform designed for Spanish-speaking youth and creators across Latin America, Spain, and the U.S. Hispanic market.

We are currently preparing the technical roadmap for the project and are looking for a development partner with strong experience in EdTech, AI-powered talent discovery, and scalable multi-language platforms. Your portfolio appears highly aligned with what we are building.

I would kindly like to request a 3-phase cost estimate for the development of the platform

Phase 1 – Pre-Start / Pre-Production
(Discovery & Architecture)

- Product discovery workshop
- Technical consultations
- UX research
- Platform architecture
- User flow
- Initial UX/UI wireframes
- Technical documentation
- Full development roadmap

Phase 2 – MVP / First Launch Version

- Multilingual platform (web + mobile responsive)
- User accounts & profiles
- Course/MasterClass module
- Video streaming & content hosting
- AI-assisted talent discovery (basic version)
- Payment system
- Admin panel
- Basic analytics
- Security & infrastructure setup

Phase 3 – Full Product

- Advanced AI talent discovery engine
- Gamification layers
- Community / creator ecosystem
- Creator tools & dashboards
- Live events module
- Multi-region deployment (LatAm + Spain)
- Scalability & performance optimization
- Mobile apps (iOS/Android)

We would appreciate:

- A cost estimate for each of the three phases
- Proposed timeline (per phase)
- Recommended team structure
- Technology stack you suggest
- Availability for an online meeting

Platform is planned for initial release in Q1–Q2 2026, so we are moving quickly to select the final tech partner.

Thank you very much in advance.
I look forward to your reply.

Below you will find a detailed functional overview of the product.

1) PLATFORM FUNCTIONAL OVERVIEW

A. User Types

1. Students / Young Creators (Core Audience)
2. Professional Creators / Mentors / Instructors
3. Parents (optional future stage)
4. Admin Team
5. AI Talent Discovery Engine (system layer)

B. Core Functional Modules

1. MasterClass-Style Learning

A professional educational module with:

- Video lessons (on-demand)
- Multi-episode MasterClasses
- Subtitles in ES/EN/PT
- Downloadable materials (PDF, notes)
- Quizzes / learning checkpoints
- Certificates

Creators can upload their own educational content in Phase 3.

2. AI Talent Discovery Engine

Key USP of platform.

Basic Version (Phase 2 MVP):

- Users upload short videos
- AI categorizes talent: music / dance / creativity / personality
- AI scoring basic metrics: clarity, tempo, articulation, energy, confidence

Advanced Version (Phase 3):

- Deep-learning talent ranking
- Emotional expression analysis
- Movement / posture recognition (dance, acting, sport)
- Voice analysis
- “Talent trajectory prediction”
- Matchmaking between talent & mentors

3. Creator Hub

A dedicated space for creators:

- Upload videos
- Create courses
- Manage audience
- Earnings dashboard
- Messaging with fans (optional future module)
-

4. Community Layer

- User feed
- Challenges (e.g., weekly AI challenges)
- Comments / likes
- Following creators

5. Gamification

- XP points
- Levels
- Badges
- Daily streaks
- Creative missions
- Monthly competitions

6. Monetization (Global + LatAm specific)

- Stripe / PayPal / Apple Pay
- Pix (Brazil)
- MercadoPago (LatAm)
- Subscriptions (monthly / annual)
- In-app coins for unlocking premium features (Phase 3)

7. Admin Panel

- Creator management
- Course approval
- Content moderation
- User management
- Analytics dashboards
- Talent reports (AI insights)

C. Non-Functional Requirements

- Multi-language system (ES/EN/PT)
- Scalable for >10M users
- Cloud infrastructure (AWS preferred)
- High video performance + CDN
- Mobile-first
- Data security (GDPR + LATAM compliance)

2) 3-PHASE DEVELOPMENT PLAN (REQUEST FOR QUOTATION)

Phase 1 – Pre-Start / Pre-Production

(Discovery & Architecture)

- Product discovery workshops
- UX research
- Platform architecture (high-level + low-level)
- Feature specification
- User flows
- Wireframes
- Technical documentation
- Full development roadmap

Phase 2 – MVP / First Launch Version

- Web platform (responsive)
- User accounts & profiles
- Course/MasterClass module
- Video hosting & player
- Basic AI talent discovery
- Payment system
- Admin panel
- Analytics
- Infrastructure setup

Phase 3 – Full Product

- Full AI engine
- Creator Hub
- Community & feed
- Gamification
- Mobile apps (iOS/Android)
- Multi-region scaling
- Advanced events module
- Performance optimization

We would appreciate:

- A cost estimate per phase
- Suggested timeline per phase
- Team composition
- Technology stack recommendations
- Earliest possible start date
- Availability for an online meeting

Warm regards,
